

Thermal Stability Test

Heating Block Thermostat for Determining Thermal Stability of PVC compounds according to EN 60811-3-2 (DIN VDE 0473)

The instrument consists of:

- Heating block, electrical heated
40 Holes; Diameter: 5,2 mm; Depth: 65 mm
Temperature probe: 1 x PT100
- Digital heating controller (PID);
Adjustable temperature range: RT..210°C;
Control Accuracy: $\pm 0.1^\circ\text{C}$
- 1 set of 100 test tubes, diameter 5 mm, length 110 mm

Power Consumption: 500 W;
Mains connection: 230 V / 50 Hz
Weight: 8.5 Kg
